- Working from home
- Creating or being part of group projects
- Keeping track of changes made to projects
- Planning the next steps of projects
- A platform to assist his self improvement in software developing and engineering
- Having the platform on him at all times

Bio

Twenty-one year-old Kunal is a computer science undergraduate student at the University of Toronto. He lives in his parents' house in Mississauga and works in downtown Toronto as a software engineering intern. He follows the latest technology trends and is up to date with the latest gadgets. Kunal likes working from home and sometimes brings his work tasks home to finish them in his own time. Despite his understanding and experience with software developing, he struggles with group projects and lacks scrum knowledge and collaboration skills.

Since Kunal is a student he doesn't have many commitments and obligations regarding family, but his weekly schedule is quite busy. He wakes up at 7am every day and goes for a morning run. On Mondays, Wednesdays and Fridays, he has classes until late, and the rest of the week he goes to work. Kunal also enjoys swimming and basketball. He is part of the basketball team at school and has won many trophies throughout his life.

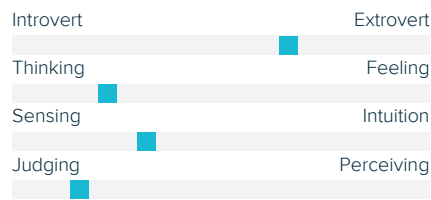

Skills

- Self confidence
- Decision making
- People management
- Problem solving
- Strategic thinking
- Maturity
- Prioritizing
- Communication

Age: 30
Location: Calgary, Alberta
Marital status: Single

- Only people she chooses can perform certain tasks (power hierarchy)

Bio

Tanya is professional Scrum Master for a fortune 500 company based out of Calgary and has worked there for 3 years now. She is currently the project manager and the scrum master for a new Android Application with a team that is scattered all around Canada. Tanya was born and went to elementary school in Japan. Her family then immigrated to Calgary, Alberta. She is a very people oriented person and loves to work with others. Currently she is managing a team who is working on a charity app to help the less fortunate and is using our app to manage her team who works all over the world.
